

# Google Map Business Extractor

Google Map Business Extractor is an advanced tool to extract business information from Google Map, You can extract the Business Name, Description, Website, Phone, Address, Global Rating, Total Reviews, Plus Code, and also the new option: extract the images of the business into your PC.

Google Map Business Extractor allows you to set how many businesses you want to extract, just set the pages counts field, and every page contains 20 business, you can also set some advanced settings like set how many seconds to wait after every scrape or extract operation, how many seconds to wait after every X scrape operation, you can set all at 0 to finish the extract process as possible.

Google Map Business Extractor allows you also to know how many businesses are being extracted, how many pages are being extracted with a nice loading design.

A new option was added to Google Map Business Extractor and is the Language, you can choose from 4 languages: English(Default), French, Germany, Arabic.

Features :

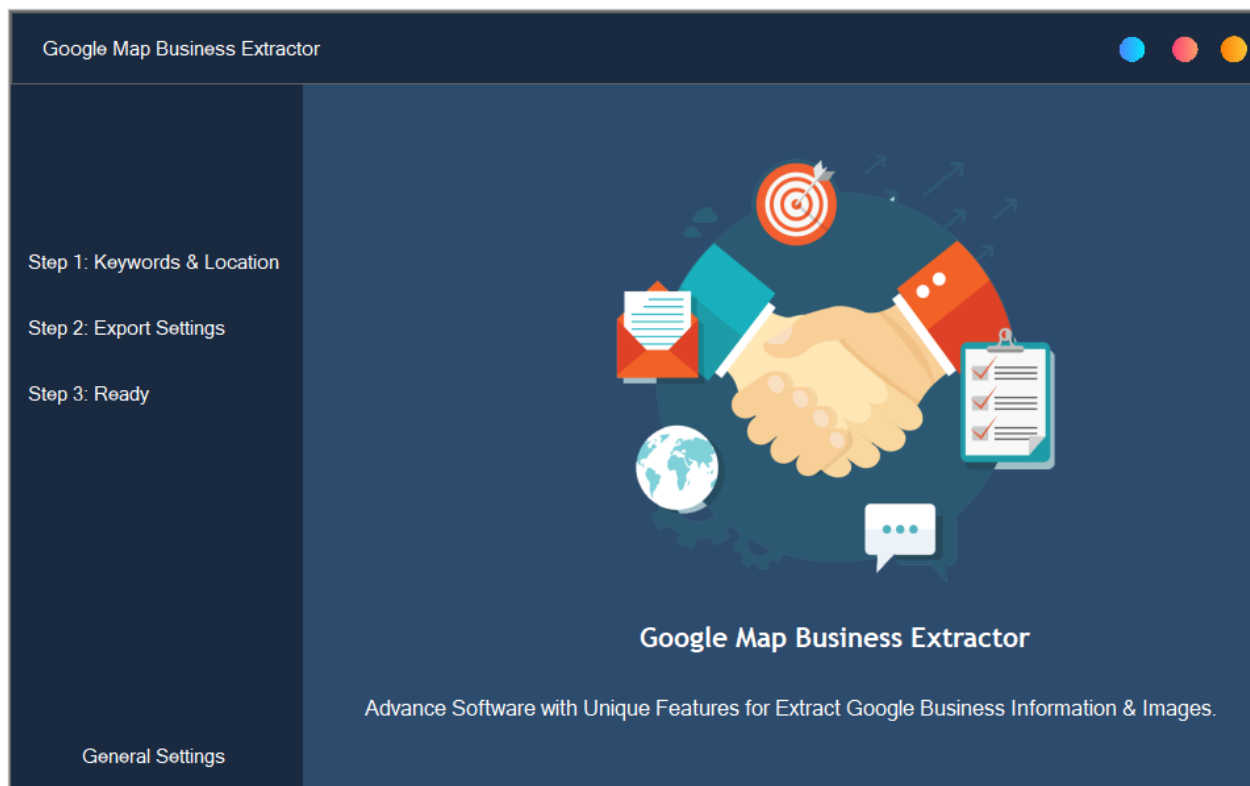

- Modern UI
- Full Control of Extracted Information
- Extract Business Images in Separated folder
- Choose The Language
- Extract Results in CSV File Format
- Extract Up To 8 Business Information (Name, Description, Phone, Website, Full Address, Global Rating, Total Reviews, Plus Code)

---

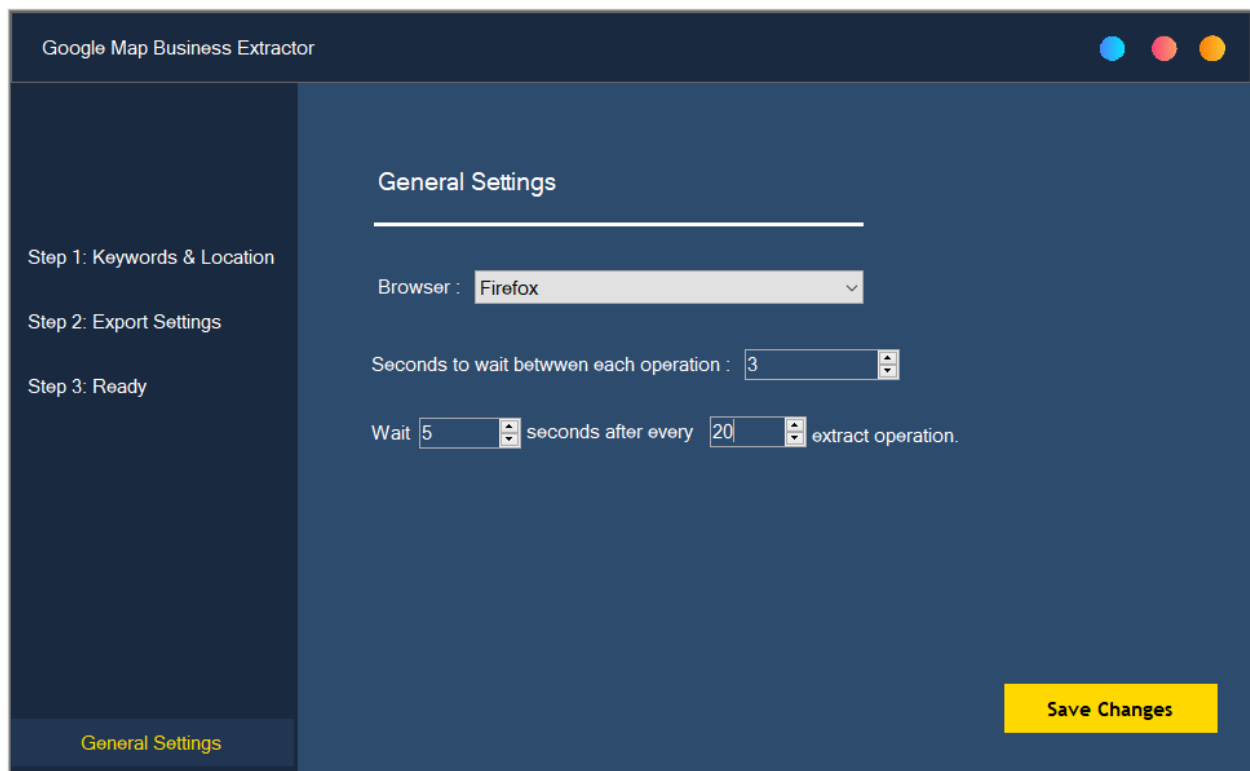

*Setup Google Map Business Extractor*

---

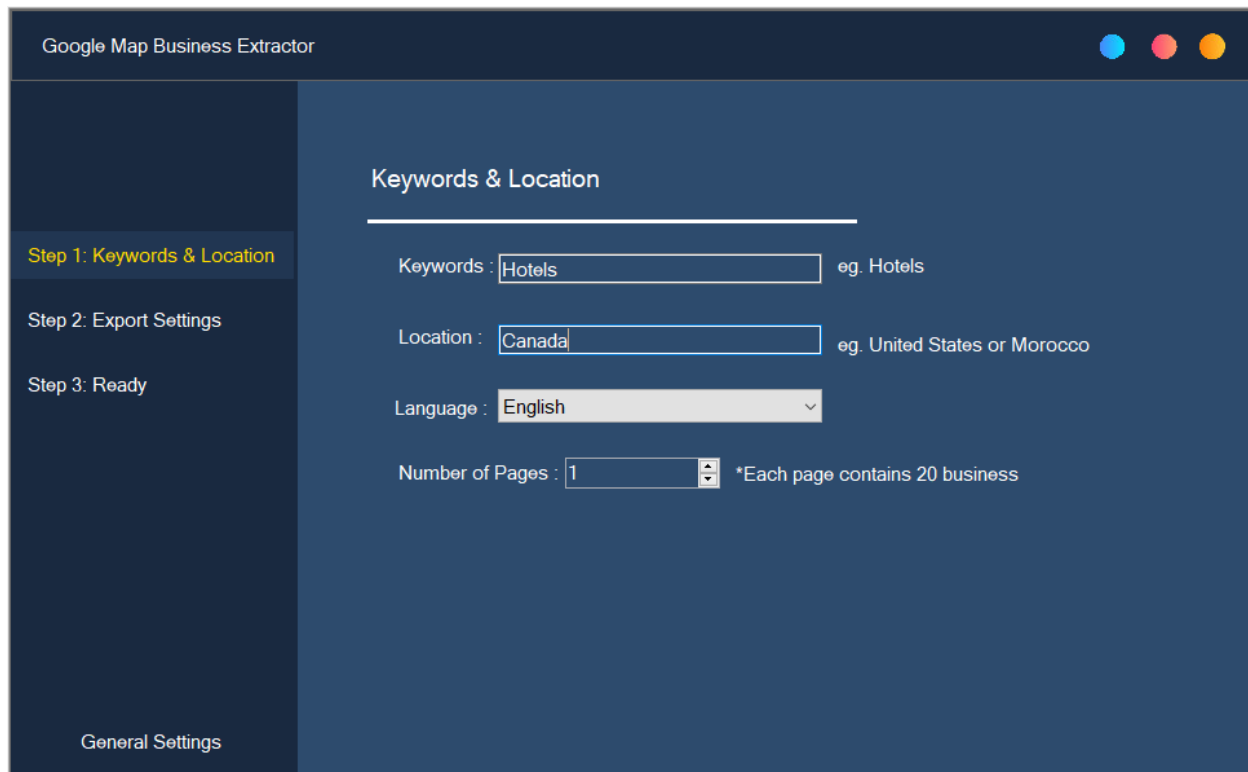

Unzip the main file, from the folder release run **Google Map Business Extractor.exe**:

First step is setup the settings, from the left menu click **General settings** :

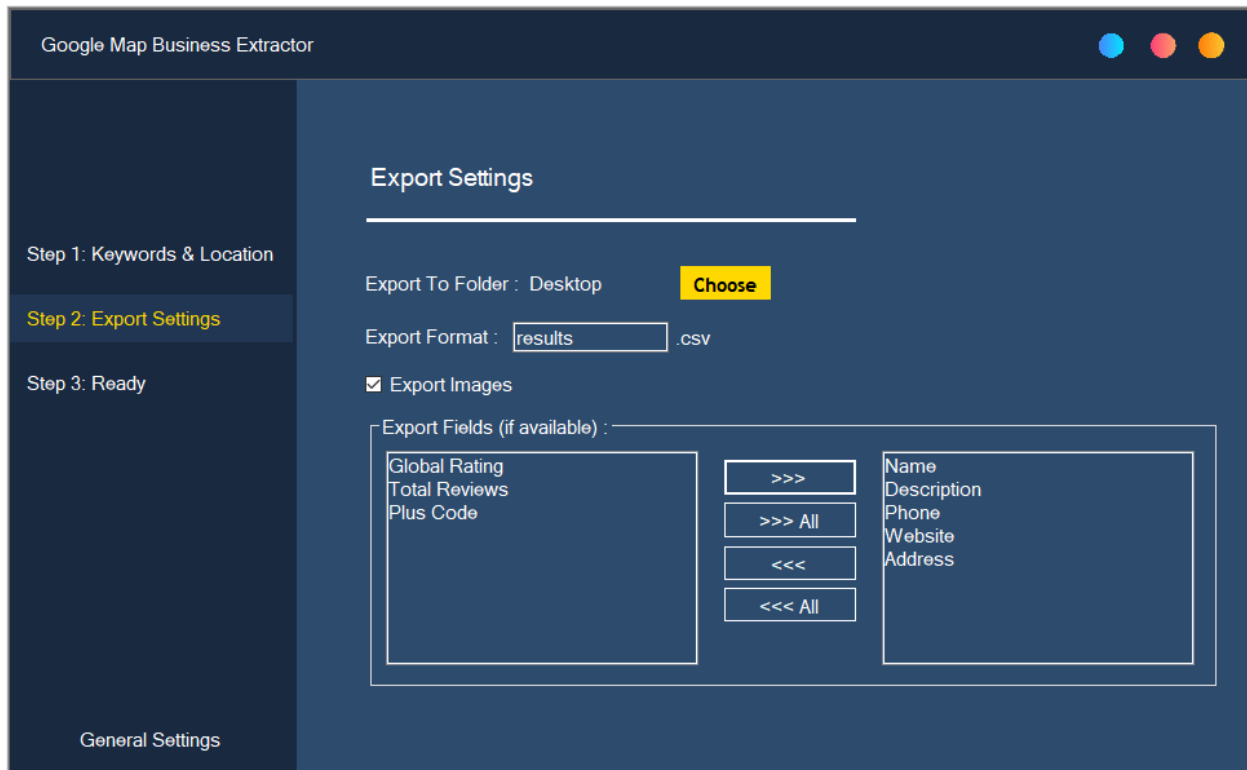

Next, go to Step 1: Keywords & Location, enter the main keyword , the location, the language of the google map and numbers of pages to extract :

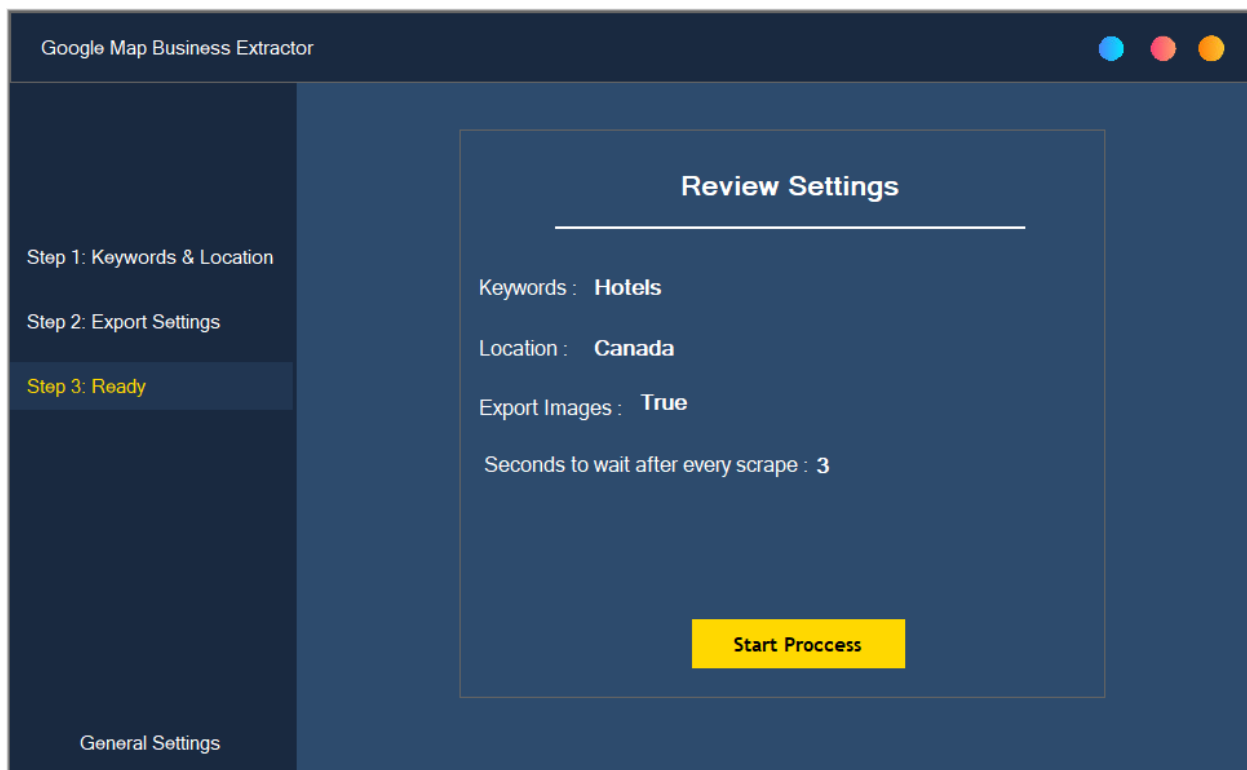

The screenshot shows the 'Google Map Business Extractor' application window. On the left is a dark sidebar with three steps: 'Step 1: Keywords & Location' (highlighted in yellow), 'Step 2: Export Settings', and 'Step 3: Ready'. At the bottom of the sidebar is a link for 'General Settings'. The main area is titled 'Keywords & Location' and contains four input fields: 'Keywords' with the value 'Hotels' and a hint 'eg. Hotels'; 'Location' with the value 'Canada' and a hint 'eg. United States or Morocco'; 'Language' with a dropdown menu set to 'English'; and 'Number of Pages' with a spinner set to '1' and a note '\*Each page contains 20 business'.

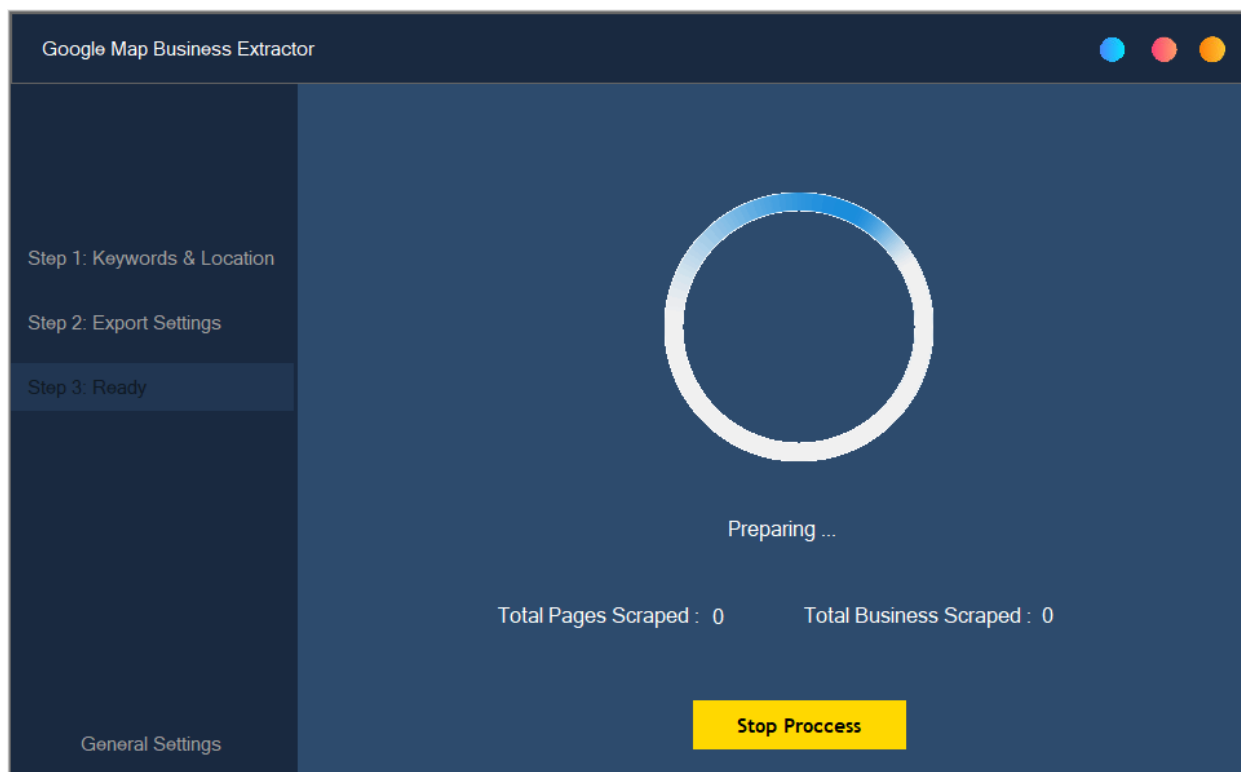

Now Go to Step 2: Export Settings, choose the folder which the report will be saved and business images if you choose to export images, and the fields to export :

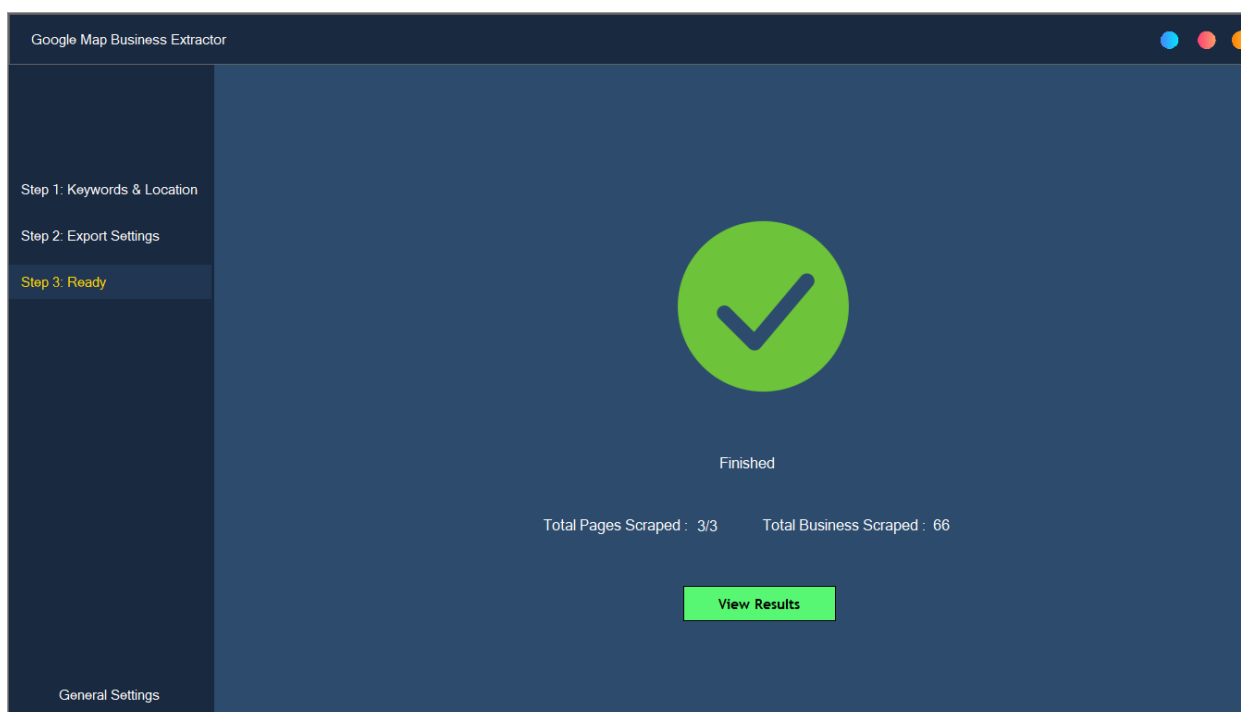

Now The last step is review your campaign settings, if all is correct click Start Process:

After you click start you will see an updatable window with Total pages scraped and total business:

After the process finish you will this window :

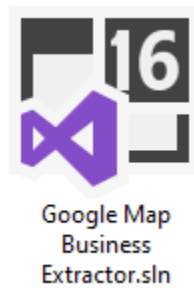

Now the results and images are already saved in the folder you choose in the Step 2.

---

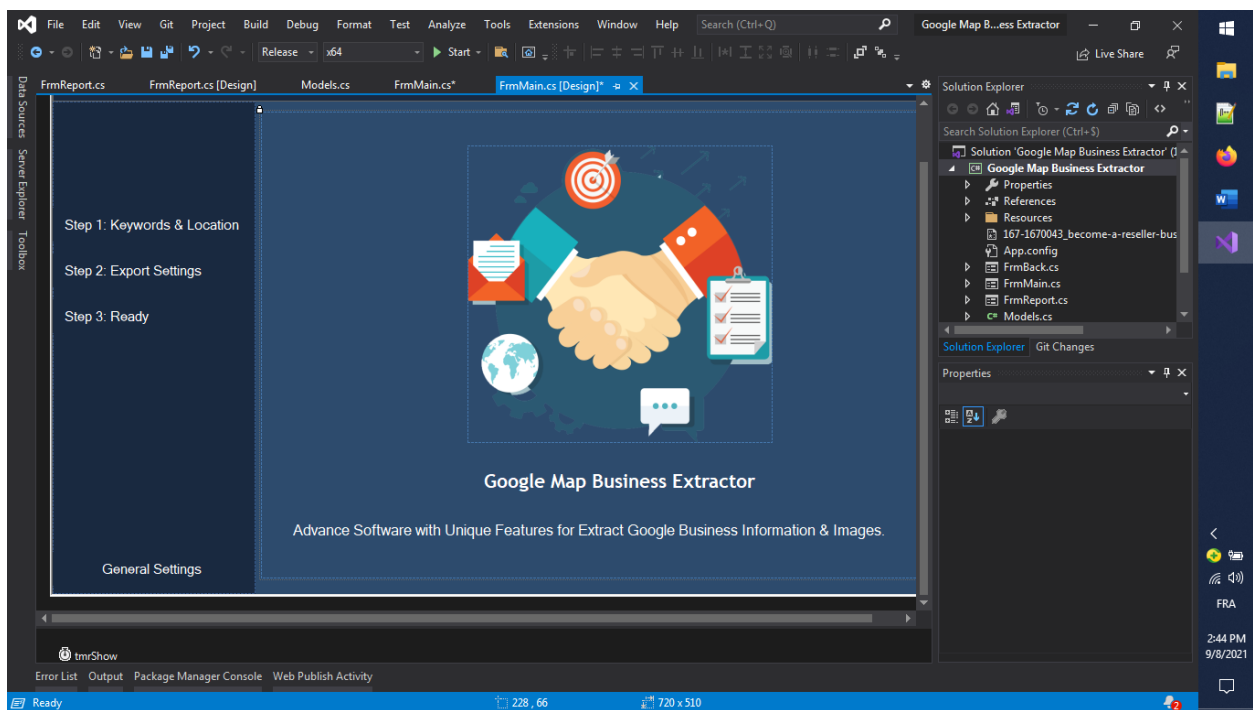

## Edit The Source Code

---
